AN EASY WAY TO DUST-FREE SANDING

DEDICATED TO THE FINISH

ABOUT US

DEDICATED TO THE FINISH

Mirka is a world leader in abrasives technology innovation, offering a complete range of technically superior, high quality abrasives, innovatively designed tools, supplementary products and complete sanding systems. This total innovative solution delivers real benefits to customers in terms of speed, first-class efficiency, surface finish quality and cost effectiveness, even when tackling the most demanding applications.

Decades of experience and a strong commitment to product development has seen us become a pioneering specialist in flexible abrasives and revolutionary, patented products which allow customers to enjoy a truly dust-free surface finishing process.

Additionally, we have through our innovative research and development program, also launched new microfinishing products for optimised engineered surface finishing processes, as well as a full range of polishing compounds.

Moreover, the growing Mirka Power Tools department develops and manufactures advanced sanding and polishing machines, providing outstanding ergonomic and functional benefits to users. These innovatively designed tools combined with a range of effective, high quality accessories, give Mirka's customers' unmatched access to a complete sanding solution to meet their individual needs.

MIRKA

WE STAND FOR OUR CLEAN COMMITMENTS

Our business is focused on providing the best surface finishing preparation tools and systems to customers. To be the most sustainable finishing systems provider, we are digging deep down to the core of our company to figure out what it really means to be sustainable. We have accomplished a great deal already and have many more initiatives we will take on in the future.

For people working at Mirka, it has always been clear to not waste financial or material resources – of our own or those of our customers. We find it is equally clear to preserve the planet's resources. Sustainability is a natural extension of this approach. It means taking the economy, the earth, and people into consideration when we make business decisions – now and for future generations.

We are continuously looking for opportunities to reduce our environmental footprint – this aligns with our company values and also cuts costs. We have worked hard to conserve energy and raw materials, reduce waste, increase recycling, and decrease the use of persistent chemicals. We are developing healthier, safer, and more efficient products and processes so that our customers and employees will benefit. For example, our dust-free sanding systems help protect the lungs of workers while giving a cleaner and better surface finish.

ABRANET®

DUST-FREE PERFECTION

Mirka was the first abrasives company in the world to develop a dust-free sanding system. It was a five-year process to bring this revolutionary technology to the market and almost ten years to gain buy-in to the market. It has been well worth it. Mirka's net abrasives have won many product innovation awards and have been a best seller across the globe.

With Abranet, Mirka has succeeded in something where many others have previously failed – to develop a completely even sanding net. Its thousands of holes provide phenomenal dust extraction. The maximum distance from each sanding particle to the closest dust extraction hole is just 0.5 mm. This clever structure provides many advantages. Using Abranet, dust is removed from the space between the abrasive and the sanded surface, which means that the abrasive grains are cutting the surface more efficiently.

Because the dust is being continuously sucked away, sanding is virtually dust-free. Keeping the abrasive and the sanding surface constantly dust-free extends the lifespan of the abrasive. Since the abrasive maintains its aggressive properties over the entire surface, sanding becomes more even and efficient, improving the quality of work. Since you can always see what is being sanded, you gain excellent control over the work to avoid over-sanding, for example.

Abranet solves many dull problems, such as the formation of so-called dust pills and clogging. Because dust no longer collects in lumps on the sanding discs to the same extent as before, there is no danger of sanded dust building up and creating grooves on the sanding surface, or filling up the disc and thus reducing its sanding capacity.

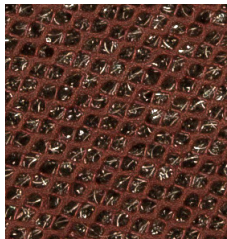

Dust-free is not only safer to our health, it makes plenty of sense time and moneywise. On the level of a working individual, it is easy: done, done and done. For a business, it is the best choice measured and calculated by any means. For an industry, it means progress and a step forward in standardisation.

TOOLS

IMPROVE YOUR PERFORMANCE

Mirka provides a wide range of high quality tools. Mirka electric sanders are unique, lightweight and equipped with a compact design. The optimized ergonomics make it comfortable to grip and easy to use, while the low profile design gives a high manoeuvrability and helps to deliver precise and efficient sanding performance. The innovative brushless electric motor is powerful enough to maintain a constant speed under load. Mirka's electric sanders are also virtually silent in operation, cheap to run and require minimal maintenance.

Our power tools have a 2 + 1 year warranty, starting from the date of purchase. The prerequisite for the + 1 year warranty extension is that the tool has to be registered within 30 days from purchase. If the tool is continuously used in industrial applications the warranty period is one year.

The easiest and quickest way to register your tool is through the myMirka app that can be downloaded from App Store or Google Play. You can also register your tool on a Mirka website. More information about myMirka can be found on www.mirka.com/myMirka and about the Mirka power tool warranty and registration on www.mirka.com/warranty_registration/.

Multifunctional, dust-free net abrasive, especially developed for sanding putty, primers, lacquers, composite materials and a large amount of other materials. Long-lasting, cost-effective and easy to use.

ABRANET

The multifunctional and classic Abranet is especially developed for sanding putty, primers, lacquers, composite materials and a wide range of other materials for industrial use. Abranet combines high performance and a longer lifespan than traditional abrasives, making it a cost-effective solution. Designed for dry sanding by machine or by hand, its true dust-free sanding characteristics result in a cleaner work environment, as well as a better surface finish.

Dust-free ceramic net abrasive for hard surfaces and heavy-duty applications.

ABRANET ACE HD

Abranet Ace HD is durable and tough with ceramic grains. The strong net structure resists high wear and tear and the product is ideal for heavy-duty applications. The improved woven mesh backing increases the lifetime of the abrasive, and makes the sanding process faster. Abranet Ace HD for dust-free sanding has coarse grits P40, P60, P80 and P120.

OSP

OPTIMISED SURFACE PREPARATION SYSTEM

Mirka's net abrasive success story took a big step forward when the ground breaking OSP (Optimised Surface Preparation) system recently was introduced to the market. The OSP system is a net sanding system solution for Automotive Refinishing, a simple standardised system with a clearly defined process and maximised performance. Easy to learn, with fewer steps than traditional systems and of course dust-free, like all Mirka's net abrasives.

MIRKA
OPTIMIZED
SURFACE
PREPARATION
SYSTEM

What is OSP?

Mirkas's Optimized Surface Preparation System is truly unique thanks to an innovative combination of high-tech abrasives, tools and processes that cannot be compared to anything else on the market today. The focus on speed, control, simplicity and repeatability instantly makes traditional methods inefficient and obsolete.

Just some of the benefits include:

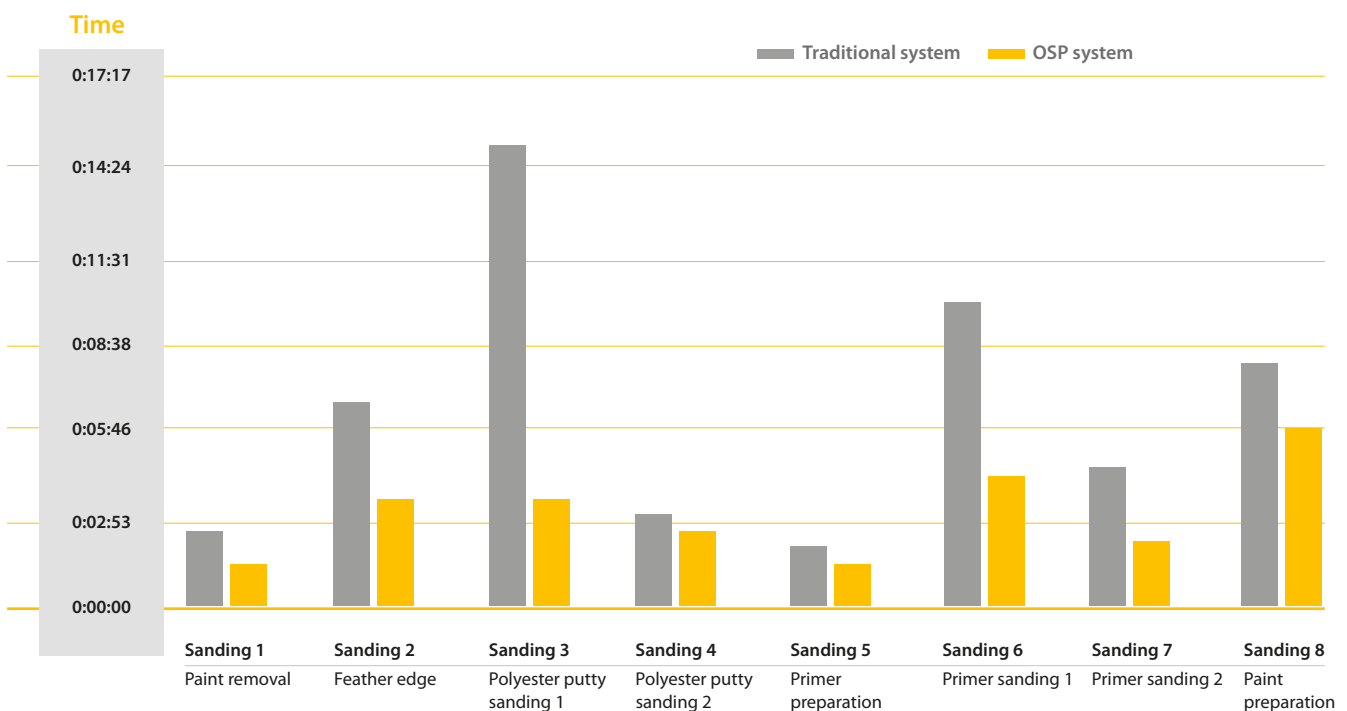

- Increased sanding speed and efficiency saves time on every job which boosts productivity and profitability.
- Standardized, step-by-step processes means predictable, consistent quality on every repair.
- 'Dust free' – the workshop stays cleaner which helps reduce the risk of dust inclusions in paintwork and minimizes the need for de-nibbing.
- Healthier workshop environment for staff.

Standardized repair process is one of the keys to get the smooth workflow in the body shop. With the OSP system it is a clear and simple process which impacts to keep the focus and achieve the goal for the day – Correct accomplished repairs on time.

Time studies performed in body shops show a time saving in sanding process of 30% thanks to the OSP system.

Sanding time comparison

OSP vs. Traditional system

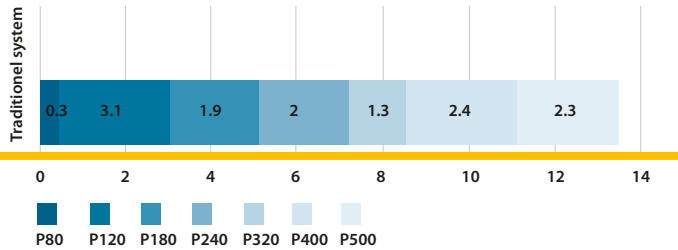

OSP

The simplified OSP system gives a reduced abrasive material consumption. Facts based on studies in body shops show an abrasive material decrease of 32%.

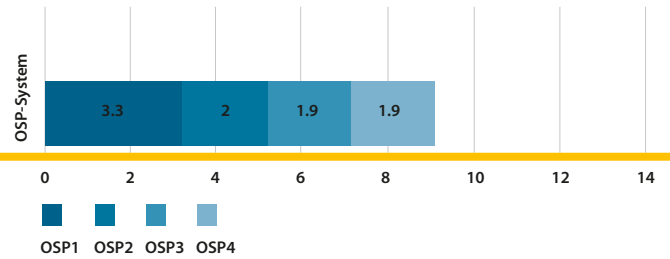

Abrasive consumption

– Traditional system Average 13,3 pcs

Abrasive consumption

– OSP system Average 9 pcs

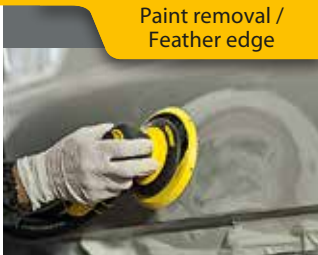

The OSP Small to Medium Repair Process

Preparation is key!

To achieve a good paint adhesion, make sure that the substrate is clean.

Paint removal /
Feather edge

OSP PRODUCT

USE:

- Disc or strip No 1 for paint removal.
- Disc or strip No 2 for feather edge.

Polyester filler

Primer preparation

OSP PRODUCT

USE:

- Strip No 1 to level polyester filler.
- Strip No 2 for final leveling and as first step on fine polyester filler.

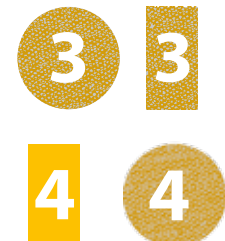

USE:

- Disc No 3 to prepare the repaired area for primer by reducing scratches and expanding the feather edge.

Finishing

OSP PRODUCT

USE:

- Disc or strip No 3 to level structure on primer.

USE:

- Soft pad No 4 for hard-to-reach areas.

USE:

- Finalize the sanding with disc No 4.

The OSP Spot Repair Process

Preparation is key!
To achieve a good paint adhesion,
make sure that the substrate is clean.

Paint removal and
Feather edge sanding

OSP PRODUCT

ABRALON®

USE:

- Abralon 77 mm grit 1000 for feather edge and grit 2000 for fade out

- Mirka OSP-1: 150 mm, 77 mm paint removal disc, 70 x 198 mm body filler strip, 70 mm x 10 m and 115 mm x 10 m rolls
- Mirka OSP-2: 150 mm, 77 mm feather edge disc, 70 x 198 mm body filler strip, 70 mm x 10 m and 115 mm x 10 m rolls
- Mirka OSP-3: 150 mm, 77 mm primer preparation disc, 70 x 198 mm primer and body filler strip, 70 mm x 10 m and 115 mm x 10 m rolls
- Mirka OSP-4: 150 mm, 77 mm finishing disc and Mirka OSP-4 115 x 125 mm hand finishing pad

OSP

- A truly unique optimised surface preparation system for the automotive aftermarket
- An innovative dust-free combination of high-tech abrasives, tools and processes
- Increased sanding speed and efficiency saves time on every job which boosts productivity and profitability
- Standardised, step-by-step processes mean predictable, consistent quality on every repair
- Enables a healthier workshop environment for the bodyshop staff

MIRKA® AP – THE COMPACT POLISHER FOR SMALL AREAS

Have you already seen our newest member in the pneumatic polisher range? If not, we are happy to introduce the Mirka AP 300NV. This dedicated angle polisher, equipped with a 77 mm backing pad, is ideal for small polishing applications such as spot repairs. In the OEM -industry, on the other hand, the machine is great for polishing composite and plastic parts as well as car bodies. The machine is easy to handle and can be used for long periods due to the ergonomic design, low vibration levels and speed adjustment.

GOLDEN FINISH

SANDING AND POLISHING – DUST NIBS

DEFECT REMOVAL

USE: Golden Finish SR disc. Apply water to both disc and surface. Use Mirka finessing damper. Sand 3–5 seconds, wipe and check visually. Repeat operation until defect is removed.

POLISHING

USE: Remove sanding scratches in first polishing step with Polarshine 20 in combination with Golden Finish Pad-1. Remove holograms and to achieve a high gloss finish use Polarshine 5 in combination with Golden Finish Pad-2.

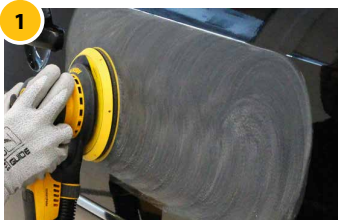

TOOL AND TECHNIQUE: For sanding use Mirka cordless sander AOS-B or AROS-B. Keep tool in an straight angle with light pressure against surface during sanding. For polishing use Mirka polisher ROP2 312NV or AP 300NV. Adjust polisher to medium speed. Use circular movement for both sanding and polishing.

PRODUCTS

SANDING AND POLISHING – LARGE AND SMALL AREAS

DEFECT REMOVAL

USE: Golden Finish Disc-1 to remove defect. Use 5 mm interface pad to reduce cutting force and for contoured areas.

CONDITIONING OF SCRATCHES

USE: Golden Finish Disc-2. Damp sanding. Spray water on both disc and surface. Sand over surface 3–4 times to achieve a uniform scratch pattern.

TOOL AND TECHNIQUE: Use DEROS 650CV to sand large areas and CEROS 325CV for small areas. For gentle sanding use tool at speed 6.000 rpm. Keep tool flat on surface during sanding operation.

PRODUCTS

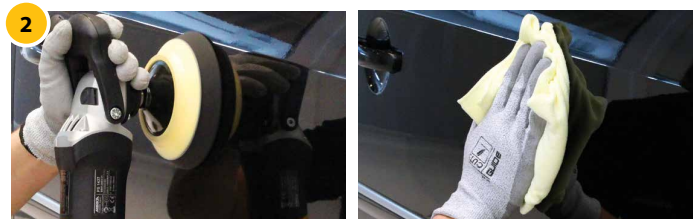

POLISHING / SCRATCH REMOVAL

USE: Polarshine 20 in combination with Golden Finish Pad-1.

POLISHING / HOLOGRAM REMOVAL

USE: Polarshine 5 in combination with Golden Finish Pad-2. Polish until most of compound residue is removed. Keep pad flat against surface. Final wiping with a clean Mirka yellow micro fiber cleaning cloth.

TOOL AND TECHNIQUE: Use Mirka PS1437 rotary polisher. Adjust tool speed at maximum 1.300 rpm. Use small amount of compound which is consumed on a focused area. Add more if needed or if starts to dry out during operation.

PRODUCTS

GOLDEN FINISH

GOLDEN FINISH

- A unique, fast and simple post paint solution
- Standardised step-by-step process ensures consistent high quality
- Sanding in two steps for the perfect high-gloss finish
- Polishing in two steps for the perfect high-gloss finish
- Includes microproduct for sanding small defects and micro fiber cloth for finishing touches
- Recommended tools: Mirka DEROS 650CV for sanding, Mirka AOS-B 130NV for spot repairs and Mirka PS 1437 for polishing
- A unique, fast and simple post paint solution

2+1 YEAR WARRANTY

FOR ALL MIRKA SANDERS AND DUST EXTRACTORS

The 2+1 warranty, starting from the date of purchase, applies for all Mirka sanders, polishers and dust extractors. The prerequisite for this +1 year warranty extension is that the tool has to be registered on a Mirka website within 30 days from purchase. Warranty certificates are machine and customer dependent; each tool must be registered separately. Registration and additional warranty cannot be transferred to another person or company. If a problem occurs with a Mirka tool caused by a manufacturing defect material or by workmanship; Mirka will repair your tool free of charge in accordance with the warranty terms.

AFTER SALES AND SERVICE

Mirka is co-operating with professional authorised service centers, locally or regionally. In order to keep the tool warranty valid and ensure optimal tool safety and function, the service on Mirka branded tools must be carried out by a Mirka authorised service centre. To locate your local Mirka authorised service centre, contact Mirka Customer service in your country or region or your Mirka dealer.

Any maintenance or repair work requiring the motor housing to be opened may only be carried out by an authorised service centre. If a problem occurs with a Mirka tool included in these warranty terms and the problem is caused by a manufacturing defect material or by workmanship; Mirka will repair your tool free of charge in accordance with the warranty terms and conditions stated herein.

MIRKA

2+1

YEAR WARRANTY

Register your tool through myMirka® app or on www.mirka.com

Mirka® DEROS

NO BAD VIBRATIONS

The Mirka® DEROS electric sander has been used by thousands of professionals and been awarded with both the iF Design Award and the Red Dot Design Award since its launch in 2012. At the time, Mirka was the first company to introduce brushless motor technology in a sander and the ergonomic Mirka® DEROS is the lightest random orbital sander on the market.

The Mirka® DEROS now comes with smart features; it has an integrated vibration sensor and Bluetooth connectivity. Download and install the free myMirka app on your mobile phone and you can monitor the vibration levels of your Mirka® DEROS in real time. Those in the sanding industry recognize that long-term exposure to vibrating hand-held machinery can be damaging, with health issues such as vibration white finger (hand-arm vibration syndrome) affecting thousands of industrial workers.

At Mirka we put your health in focus. That's why Mirka® DEROS has low vibration levels when compared to other sanders on the market. With this new smart feature for measuring vibrations, however, it's easier than ever to avoid the kind of long-term exposure that may be harmful. myMirka gives you real values in real time and a simple way to keep track of daily exposure levels.

MIRKA® DEROS

Direct electric random orbital sander developed for effective and dust-free sanding of all kind of surfaces. This upgraded Mirka Deros features an integrated vibration sensor and Bluetooth low energy technology. The smallest and most ergonomic sander on the market is equipped with a brushless motor, which maintains constant speed even under heavy load. With the lowest vibration values in its class and the unique symmetrical design guarantees that the tool can be used for long periods without fatigue. The first ever electric sanding machine with a brushless motor and no external power supply, it is also the lightest electric machine on the market.

BRUSHLESS MOTOR

Thanks to its high efficiency patented brushless motor, the Mirka Deros also has plenty of power to get the job done quickly. Indeed, its performance is actually comparable to a conventional 500W electric machine and that ensures it maintains a constant speed even under heavy load. The innovative design of the brushless motor means there are few wearing components so it is low maintenance, ultra-reliable and has a long lifespan. In contrast to conventional electric machines, the Mirka Deros also features a 'closed construction' which prevents dust from entering the motor where it can cause wear and damage.

Mirka Deros 550CV 125mm Orbit 5,0
Mirkacode: **MID5502022** EAN: **6416868241518**

This model has a 125 mm pad and 5.0 mm oscillation. Perfect for smaller operations. With the lowest vibration values in its class and the unique symmetrical design guarantees that the tool can be used for long periods without fatigue.

Mirka Deros 625CV 150mm Orbit 2,5
Mirkacode: **MID6252022** EAN: **6416868241464**

Mirka Deros 625CV direct electric random orbital sander is equipped with a 150 mm pad and has a 2.5 mm oscillation. With the lowest vibration values in its class and the unique symmetrical design guarantees that the tool can be used for long periods without fatigue.

Mirka Deros 650CV 150mm Orbit 5,0
Mirkacode: **MID6502022** EAN: **6416868241433**

The top seller, Mirka Deros 650CV 150mm Orbit 5,0, has the perfect combination of power and the low vibrations. Mirka Deros 650CV direct electric random orbital sander is equipped with a 150 mm pad and has a 5 mm oscillation.

Mirka Deros 680CV 150mm Orbit 8,0
Mirkacode: **MID6802022** EAN: **6416868241495**

Mirka Deros 680CV direct electric random orbital sander is equipped with a 150 mm pad and has a 8 mm oscillation. With the lowest vibration values in its class and the unique symmetrical design guarantees that the tool can be used for long periods without fatigue.

Mirka Deros 5650CV 125/150mm Orbit 5,0 Case
Mirkacode: **MID5650202CA** EAN: **6416868241426**

Mirka Deros delivered in Mirka Case includes both 125 mm and 150 mm pad, which enables the operator to choose the pad size according to surface size. This upgraded Mirka Deros features an integrated vibration sensor and Bluetooth low energy technology.

Mirka® DEOS

CLOSER. FOR PERFECTION.

Mirka DEOS, the electric orbital sander, integrates all the innovative features that have made Mirka DEROS so popular, and more. Its high efficiency brushless motor exerts plenty of power so the sander completes jobs quickly. At only 10 cm high, the tool's compact and very low profile gives a high maneuverability and helps deliver a precise and efficient sanding performance.

Our tools have been awarded for their innovative design and the Mirka DEOS is no exception, placing top priority on its excellent ergonomic design to ensure that the sander can be used comfortably for long periods without fatigue.

The Mirka DEOS electric orbital sander is compact and very light. The machine is available in two dimensions: the Mirka DEOS 383CV, 70 x 198mm, is designed mainly for the automotive sector and the Mirka DEOS 353CV, 81 x 133mm, is mainly targeted at the wood and construction & decoration sectors.

At Mirka we put your health in focus and we are aware of the harmful vibrations generated when working with sanders. That is why we have developed an app to respond to the growing importance of health and safety in the workplace and specifically to help workers avoid harmful vibrations. Both Mirka DEOS and Mirka DEROS are equipped with Bluetooth low energy technology. The sanders can be connected to the myMirka app via Bluetooth. myMirka is the platform providing digital services and connectivity solutions.

my Mirka®

 **Bluetooth®**

MIRKA® DEOS

Imagine the perfect surface. Thanks to the new Mirka® DEOS electric sander, you can obtain that flawless end-result easier and quicker than ever before. By getting you closer to the surface, we bring your sanding experience to a completely new level. A built in electronic motor brake and a smooth, easy to operate lever for controlling the motor speed makes the work easy. At the same time the optimised ergonomics enable a comfortable grip. This direct orbital sander is together with Mirka® DEROS the smartest tool on the market; Mirka DEOS features an integrated vibration sensor and Bluetooth low energy technology.

POWERFUL PARTNER

The low profile and small size make Mirka® DEOS 353CV ideal for sanding of profiles and hard-to-reach areas. The compact Mirka® DEOS 383CV is ideal for body filler and primer sanding applications. In combination with Mirka's net abrasives Mirka DEOS offers fast, efficient and dust-free sanding performance.

The small and light sander is naturally equipped with a brushless motor. It possesses also a separate on/off switch for easy and safe handling. This direct orbital sander is together with Mirka® DEROS the smartest tool on the market; Mirka DEOS features an integrated vibration sensor and Bluetooth low energy technology.

NEW

Mirka® LEROS

PERFECTION FROM ANY ANGLE.

The Mirka development team has done it again. Years of development work and a determined focus on ergonomics and user-friendliness have resulted in the lightest brushless electric wall and ceiling sander on the market, Mirka® LEROS. This unique tool has features like no other comparable sander on the market.

Thanks to the light weight, less than 3,5 kg, the sander can be used for longer periods putting less strain on the operator's body. Mirka® LEROS is the first wall sander with 180° flexibility on the sanding head and this helps the operator reach the surface from a better angle and allows a more ergonomic working position. Thanks to the random orbital movement the sander responds precisely to the operator's movements.

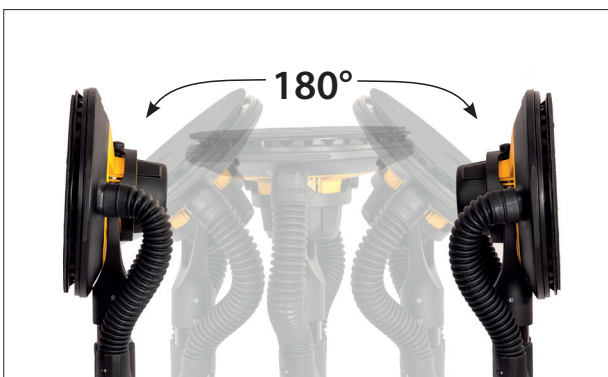

The special sanding head and backing pad design makes it possible to work very close to corners/edges. Furthermore the fixation point of the sanding head is close to the surface and contributes to more stable sanding. A practical carrying bag is included in the package.

Technical specifications	Mirka® LEROS 950CV
Power input	350 W
Speed	4,000–8,000 rpm
Orbit	5.0 mm
Noise level LpA	84 dB
Vibration level	2.5 m/s ²
Weight	3.5 kg
Disc diameter	225 mm
Dust system	Central vacuum ready

EVERYTHING YOU THOUGHT YOU KNEW ABOUT SANDERS JUST BECAME HISTORY.

180° flexible sanding head

Mirka® LEROS is the first wall sander with 180° flexibility on the sanding head and this helps the operator reach the surface from a better angle and allows a more ergonomic working position.

T-shaped handle

Another advantage of Mirka® LEROS is the optimized T-handle that makes it extremely easy to sand for longer periods and less strain is put on the operator's body.

Lightweight, only 3.5 kg

Mirka LEROS is the lightest wall and ceiling sander on the market. Because of the lightweight of the tool, the operator can sand for longer periods and less strain is put on the operator's body.

Dust-free

To enable efficient dust-free sanding the shroud has two suction points and a pad that is optimized for Abranet sanding discs. The operator saves time and money and can work in a cleaner and healthier environment.

LEROS

A NEW ERA FOR WALL SANDERS

Mirka LEROS - the lightest and most advanced wall and ceiling sander. Thanks to the light weight, 3,5 kg, the sander can be used for longer periods putting less strain on the operator's body. Mirka® LEROS is the first wall sander with 180° flexibility on the sanding head and this helps the operator reach the surface from a better angle and allows a more ergonomic working position. Thanks to the random orbital movement the sander responds precisely to the operator's movements. The special sanding head and backing pad design makes it possible to work very close to corners/edges. Furthermore the fixation point of the sanding head is close to the surface and contributes to more stable sanding.

180° FLEXIBILITY. 100% COMFORT. DUST-FREE SANDING.

The flexible and practical design gives unmatched advantages, such as ergonomic working positions and less strain on the operator's body and back. At 3,5 kg, the operator can sand for longer periods without fatigue. Combine Mirka LEROS with Mirka's dust-free net abrasives and a suitable dust extraction system to create a cleaner and healthier working environment. Not only will it speed up the sanding process, it will also save you time and money. Mirka LEROS is the lightest sander in its class. The first wall sander with a 180° flexible sanding head, an orbit movement and dual suction points.

Mirka LEROS 950CV Wall Sander 225mm Orbit 5,0 with Bag

Mirkacode: **MIW9502011BA** EAN: **6416868237344**

Unique brushless wall and ceiling sander. At 3,5 kg, the operator can sand for longer periods without fatigue. Combine Mirka LEROS with Mirka's dust-free net abrasives and a suitable dust extraction system to create a cleaner & healthier working environment.

DIGITAL SERVICES & CONNECTIVITY

Mirka's digital transformation and connectivity vision is to transform surface finishing into a digital future, by launching smart interconnections, providing added values and instant feedback to our customers and other stakeholders in a high tech smart fully integrated business environment with help of device intelligence and Big Data.

In the digital era, connectivity counts. myMirka is the platform providing you digital services and connectivity solutions, that creates value for the operators in their working environment.

Join myMirka, stay connected and utilise the added value Mirka brings the surface finishing industry, by transforming the business into a digital future.

myMirka is available on Google Play and App Store online marketplaces, get and install myMirka by choosing the marketplace for your device. The application requires version 9.1 or later for iOS devices and version 5.0 or later for Android devices. myMirka is free of charge, the app is also having in-app purchase possibilities for more features and additional services.

Get and install myMirka by choosing the marketplace for your device. myMirka is free of charge, new services are continuously launched to myMirka platform.

The app is also having in-app purchase possibilities for more features and additional services and connectivity.

HOW TO CONNECT TO myMIRKA

Mirka DEOS and Mirka DEROS electric sanders are equipped with Bluetooth® low energy technology.

Activate Bluetooth on your Mirka DEOS or Mirka DEROS as follows:

1. Connect the power cord to mains outlet.
2. Press and hold the + button while switching the tool on with the On/Off button.
3. Left LED lights up (green), to indicate that Bluetooth is active.
4. Press the Scan-button on myMirka.
5. Press the Connect-button on myMirka and choose the Mirka DEOS or Mirka DEROS showing up on the screen.
6. The electric sander and myMirka are now connected and ready to use.

Bluetooth is deactivated when the tool is disconnected from mains outlet.

Check that your connected phone or tablet is also equipped with the the Bluetooth® low energy technology and activated.

All Mirka DEOS sanders are equipped with Bluetooth low energy technology.

NOTE! Mirka DEROS sanders, with the product name printed in black on the side of the housing above the air inlets, are equipped with the Bluetooth low energy technology connectivity.

MIRO 955®

POWERFUL PARTNER

Miro 955® has been designed with a range of special features, it's easy to use, with a flexible, 225 mm sanding head and a variable speed control which makes it versatile enough to tackle a wide variety of sanding tasks. It can also be configured to minimise dust by attaching it to a vacuum cleaner. The Miro 955® is electrically powered so no compressed air source is required.

EXPERIENCE THE SPEED AND STRENGTH OF MIRO

Miro 955® with Abranet is extremely effective. Thanks to Abranet's unique net construction, clogging is minimised increasing the life expectancy of each disc. Abranet provides the best sanding result, and the most effective dust reduction. The Miro 955® range consists of a short and a long version (1.0 and 1.5 m).

The sanding plate base plate and the interface have more open design, optimised for Abranet, Ø 225 mm. The Miro 955® is one of the most powerful wall sander on the market. This makes it a perfect partner if you need to sand a big area.

Miro 955 Wall Sander 225mm Grip 230V

Mirkacode: **8394060111** EAN: **6416868903560**

The Miro 955® wall sander is equipped with a long neck, 1,5 m, that allows it to achieve excellent results when sanding filler on walls and ceilings.

Miro 955-S Wall Sander 225mm Short 230V

Mirkacode: **8394200111** EAN: **6416868916898**

This Miro 955®-S wall sander with a shorter neck, 1 m, has been designed with a range of special features, when sanding filler on walls and ceilings.

Technical Specifications

DECOSANDER®

REACH HIGHER

The Decosander telescopic sanding tool makes the sanding of walls and ceilings faster, more effective and dust-free. The package includes the sanding tool and a telescopic tube which extends up to 2.3 meters. The sanding tool is attached to the telescopic tube via a flexible joint which lets it adjust in any direction to sit flat against the sanding surface.

EASY TO USE

The operator only needs to apply light pressure because the sanding tool is drawn towards the surface when sanding. Dust is removed through holes in the sanding tool directly to a dust extractor which makes the job easier and quicker because time isn't spent protecting the surroundings from dust contamination.

Decosander 70x198mm Grip 113H
Mirkacode: 8393000111 EAN: 6416868943238

The package includes the sanding tool and a telescopic tube which extends up to 2.3 meters. The telescopic tube and hose are antistatic in order to eliminate sparks and flashovers.

USE ABRANET FOR A DUST-FREE SANDING EXPERIENCE

The multifunctional and classic Abranet is especially developed for sanding putty, primers, lacquers, composite materials and a wide range of other materials for industrial use. Abranet combines high performance and a longer lifespan than traditional abrasives, making it a cost-effective solution. Designed for dry sanding by machine or by hand, its true dust-free sanding characteristics result in a cleaner work environment, as well as a better surface finish.

Mirka® 1230

GET RID OF THE DUST

Mirka® 1230

IMPROVE YOUR PERFORMANCE

Today, health and safety issues are becoming more and more important. Sanding tools and abrasives are made more and more efficient, with focus on dust-free applications. This development places higher requirements on the dust extractors. To meet these demands, the Mirka dust extractor range has been extended with new versions of Mirka dust extractors:

Mirka® Dust Extractor 1230 L PC

Mirka® Dust Extractor 1230 L AFC (AutoFilterCleaning)

Mirka® Dust Extractor 1230 M AFC (AutoFilterCleaning)

The 1230 dust extractor range is equipped with a high-performance 1200 W motor and a 1-stage turbine that creates 250 mbar suction with an airflow of 4500 l/min. The new 1230 dust extractors include the auto-start function. As the dust extractor only runs when the power tool is in use, thanks to the auto start function, there is less noise and at the same time the dust extractor gains a longer lifetime. Bigger wheels significantly improve maneuverability on uneven floor surfaces. Another advantage is that the filter is easy to reach through a separate opening in the back without removing the upper part.

DUST EXTRACTORS

MIRKA® DUST EXTRACTOR 1230

Mirka's dust extractors are designed for dust-free sanding in combination with both electric and pneumatic machines, hand-sanding blocks, the Decosander and dry wall sanders Mirka Leros and Miro 955. The dust extractor can also be used for cleaning workrooms and has adjustable suction and automatic electric start. The hose connection is earthed in order to eliminate static electricity in the hose. This dust extractor should always be used with Mirka antistatic hoses.

IMPROVE YOUR PERFORMANCE

The 1230 dust extractor range is convenient to use as it allows a case fastening system which is available as an accessory. There is extra space on top that provides storage during use. You are able to attach one or several plastic cases on top of the dust extractor and also the new Work Station.

Mirka Dust Extractor 1230 L PC 230V

Mirkacode: **8999100111** EAN: **6416868904444**

This professional dust extractor has a high performance motor and turbine, which creates 250 mbar vacuum and 4500 l/min air flow. The AutoStart function increases the lifetime of the motor and reduces noise. A fleece dust bag is also included. Push-clean function.

Mirka Dust Extractor 1230 L AFC 230V

Mirkacode: **8999200111** EAN: **6416868904697**

Flat top with space for storage and large wheels for better maneuverability. Auto-filter cleaning for convenience and consistent performance. Hose and cable storage for more comfortable transportation. A fleece dust bag is also included.

Mirka Dust Extractor 1230 M AFC 230V

Mirkacode: **8999220111** EAN: **6416868904727**

This professional M-class dust extractor has a high performance motor and turbine, which creates 250 mbar vacuum and 4500 l/min air flow. Auto-filter cleaning for convenience and consistent performance, as well as an air-flow sensor which indicates when air flow falls below optimal. A fleece dust bag is also included.

BUILD ON TOP

This fastening allows systemers to be stored conveniently on top of any 1230 range dust extractor.

LOOKING FOR SOMETHING SMALLER?

Dust Extractor 1025 L is a compact but still high performing L-class dust extractor, proven performance for user protection and easy to move around. This dust extractor has a blow function, to blow off surfaces and to clean hard to reach areas. The container size is 25 l and the dust extractor is equipped with a carrying handle. The 5 m cord is also an optimal length for a compact dust extractor. The Push&Clean filter cleaning system enables a longer life time and better suction. This dust extractor is equipped with an auto start function that saves time and electricity for the user. Mirka Dust Extractor 1025 L is suitable for both dry and wet applications (remove the dust bag before wet use and clean filter before and after wet use).

Mirka Dust Extractor 1025 L PC 230V

Mirkacode: **8999000111** EAN: **6416868919288**

This dust extractor is equipped with an auto start function that saves time and electricity for the user. Mirka Dust Extractor 1025 L is suitable for both dry and wet applications (remove the dust bag before wet use and clean filter before and after wet use).

TROLLEYS

SOLUTION TROLLEY

This trolley is developed to be used as a part in Mirka's solution selling strategy. It has space for the Mirka dust extractor, abrasives, tools and polishing bottles.

Abrasives can be put on the top level for easy availability. There are also two drawers and a locker for storage of tools and abrasives. There is a handle for a few polishing bottles and a holder for two random orbital sanders and one orbital square sander. The trolley has also a holder with space for three hoses.

In addition to this the package contains assemble instructions, a tool and keys for the locker. The package size is 92 x 56 x 54 cm.

Solution Trolley
Mirkacode: 9190129001 EAN: 6416868912470

HOSE ARM FOR SOLUTION TROLLEY

This product can be assembled onto the Mirka solution trolley and enables more convenient working. By using the hose arm the operator ensures that the hose comes from above and reduces the risk of the hose harming the workpiece.

TROLLEY FOR DUST EXTRACTOR

A stable trolley with adjustable height and two hollow sheet metal shelves, the lower for the Dust Extractor and the other for products.

A velcro strip is also included on the right side to attach hand blocks to and an adjustable hanging device on the left side for hanging tools on. Two hooks on the back side to hang the dust hose on is also included.

This trolley is also suitable for a Dust Extractor together with the Miro 955 wall sander or the Mirka LEROS.

Trolley for Dust Extractor

Mirka® CEROS

WHEN YOU NEED A SAFE AND LOYAL MACHINE

Being electric makes Mirka CEROS conventional and practical to use in any location where a power source is available – even in remote areas or where space is severely restricted. Mirka CEROS is also a very safe tool to work with. The machine is 22 V (low voltage) which is important when e.g. wet sanding gel coat with Abralon.

EXPERIENCE THE LOW VIBRATIONS WITH CEROS

The optimised ergonomics ensure it's comfortable to grip, while the low profile design and very light weight allow easy manoeuvrability and greater control over the end finish. Moreover, Mirka CEROS has really low vibration values. It requires no special pads and is compatible with Mirka's regular 125 mm and 150 mm backing pads. The ultra-reliable hermetic brushless motor is powerful enough to maintain a constant speed under load. It is also virtually silent in operation and cheap to run. It has few wearing components so the need for maintenance is minimised and its lifespan is long.

Mirka CEROS 325CV 77mm Orbit 2,5
 Mirkacode: **MIM3252011** EAN: **6416868561029**
 Mirka® CEROS 325CV with a 2,5 mm orbit is especially developed to tackle smaller sanding operations. Thanks to its smaller backing pad, 77 mm, it is designed for smaller operations like smart repair, bumper sanding and rectification jobs in body shops.

Mirka CEROS 550CV 125mm Orbit 5,0
 Mirkacode: **MIM5502011** EAN: **6416868721423**
 Mirka® CEROS 550CV with a 5,0 orbit is particularly suited to sanding window and door frames, due to its smaller (125 mm) backing pad. Mirka® CEROS 550CV is also suitable for general sanding purposes on almost all different kind of surfaces.

Mirka CEROS 625CV 150mm Orbit 2,5
 Mirkacode: **MIM6252011** EAN: **6416868729320**
 Mirka® CEROS 625CV with a 2,5 mm orbit is an excellent choice for fine sanding tasks. Mirka® CEROS 625CV has a 150 mm backing pad.

Mirka CEROS 650CV 150mm Orbit 5,0
 Mirkacode: **MIM6502011** EAN: **6416868721447**
 Mirka® CEROS 650CV with a 5,0 orbit is an allround sander suitable for almost all kind of surfaces. Mirka® CEROS 650CV is equipped with an 150 mm backing pad.

Mirka CEROS 650CV 150mm Orbit 5,0 Case
 Mirkacode: **MIM6502011CA** EAN: **6416868752878**
 Mirka® CEROS 650CV (Central Vacuum) with a 5,0 orbit is an allround sander suitable for almost all kind of surfaces. Mirka® CEROS 650CV is equipped with an 150 mm backing pad. This Mirka® CEROS 650CV is delivered in a high quality plastic case.

Mirka CEROS 650CV 150mm Orbit 5,0 w/o PSU
 Mirkacode: **MIM6502011WP** EAN: **6416868516128**
 Mirka® CEROS 650CV with a 5,0 orbit is an allround sander suitable for almost all kind of surfaces. Mirka® CEROS 650CV is equipped with an 150 mm backing pad. This version is supplied without a Power Supply Unit.

PROS

MIRKA® PROS

MIRKA® PROS is developed in-house by the Mirka's industry leading design team. It is packed with clever features and attention to detail which has created an efficient and effective sanding tool that is perfect for professional operators. MIRKA® PROS has been specially developed to produce maximum dust extraction, even at low suction power, thanks to a wider dust suction outlet in the machine housing which substantially improves dust suction efficiency. The innovative features continue with a 'brake seal' designed to deliver a variety of valuable performance benefits.

ERGONOMICS AND DESIGN

Like all Mirka tools, MIRKA® PROS features optimised ergonomics that not only make it comfortable to grip and user-friendly for long operating periods – the design also incorporates an integrated cover which isolates the operator's hand from the cold air inlet hose fitting. What's more, it is constructed from high quality materials that deliver long term durability, ensuring you will enjoy the outstanding performance of your MIRKA® PROS long into the future. To help operators achieve the very best performance, a new backing pad has also been designed for the PROS. It features a central air inlet which results in improved air flow and helps extract dust away from the centre of the tool even faster.

Mirka PROS 550CV 125mm Orbit 5.0

Mirkacode: **8995550111** EAN: **6416868912869**

MIRKA® PROS 550CV has a five millimetre orbit and has been specially developed to produce maximum dust extraction, even at low suction power, thanks to a wider dust suction outlet in the machine housing which substantially improves dust suction efficiency.

Mirka PROS 625CV 150mm Orbit 2.5

Mirkacode: **8995625111** EAN: **6416868915297**

MIRKA® PROS 625CV has a 2,5 millimetre orbit and has been specially developed to produce maximum dust extraction, even at low suction power, thanks to a wider dust suction outlet in the machine housing which substantially improves dust suction efficiency.

Mirka PROS 650CV 150mm Orbit 5.0

Mirkacode: **8995650111** EAN: **6416868904161**

MIRKA® PROS 650CV has a five millimetre orbit and has been specially developed to produce maximum dust extraction, even at low suction power, thanks to a wider dust suction outlet in the machine housing which substantially improves dust suction efficiency.

Mirka PROS 680CV 150mm Orbit 8.0

Mirkacode: **8995680111** EAN: **6416868912098**

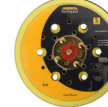

MIRKA® PROS 680CV has an eight millimetre orbit and has been specially developed to produce maximum dust extraction, even at low suction power, thanks to a wider dust suction outlet in the machine housing which substantially improves dust suction efficiency.

MIRKA® ROS

MIRKA® ROS is a powerful and dependable tool for professional sanding. It focus on comfort and convenience with compact, light-weight and ergonomic design. MIRKA® ROS comes in a variety of models for finessing and for general sanding, from 32 mm to 150 mm. You can use MIRKA® ROS with dust bag or connect to a dust extraction system for dust-free sanding. The lever is colour marked for different orbits. 5,0 has a black lever.

Mirka ROS 150NV 32mm Non Vacuum Orbit 5,0

Mirkacode: **8992450111** EAN: **6416868907339**

MIRKA® ROS 150NV (Non Vacuum) 32 mm finessing machine is light, the weight is under 0,5 kg and has a maximum speed of 8,000 rpm. It has a quick lock attachment on the backing pad, is fast and stable to use. Perfect tool for sanding smaller surface areas.

Mirka ROS 325NV 77mm Non Vacuum Orbit 2,5

Mirkacode: **8993320111** EAN: **6416868940725**

MIRKA® ROS 325NV (Non Vacuum) with a 77 mm backing pad is specially developed for spot sanding of defects. The 2.5 mm orbit guarantees a good surface finish.

Mirka ROS 325CV 77mm Central Vacuum Orbit 2,5

Mirkacode: **8993325111** EAN: **6416868938333**

MIRKA® ROS 325CV (Central Vacuum) with a 77 mm backing pad is specially developed for spot sanding of defects. When connecting the sander to a dust extraction system you are able to sand dust free. The 2.5 mm orbit guarantees a good surface finish.

Mirka ROS 325DB 77mm Dust Bag Orbit 2,5

Mirkacode: **8993425111** EAN: **6416868941159**

MIRKA® ROS 325DB (Dust Bag) with a 77 mm backing pad is specially developed for spot sanding of defects. This sander is equipped with a dustbag, so there is no need for a central vacuum system, only compressed air needed for dust free sanding.

Mirka ROS 550CV 125mm Central Vacuum Orbit 5,0

Mirkacode: **8992700111** EAN: **6416868929645**

MIRKA® ROS 550CV (Central Vacuum) is a Pneumatic Random Orbital with a 5,0 orbit. This machine is equipped with a 125 mm backing pad. When connecting the sander to a dust extraction system you are able to sand dust-free.

Mirka ROS 525CV 125mm Central Vacuum Orbit 2,5

Mirkacode: **8992725111** EAN: **6416868941166**

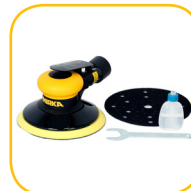

MIRKA® ROS 525CV (Central Vacuum) with a 2,5 mm orbit is an excellent choice for fine sanding tasks. When connecting the sander to a dust extraction system you are able to sand dust-free. MIRKA®ROS 525CV is equipped with a smaller (125 mm) backing pad.

Mirka ROS 550DB 125mm Dust Bag Orbit 5,0

Mirkacode: **8992800111** EAN: **6416868928778**

This machine is equipped with a 125 mm backing pad. This sander is equipped with a dustbag, so there is no need for a central vacuum system, only compressed air needed for dust-free sanding. Suitable for general sanding purposes on all kind of surfaces.

Mirka ROS 650CV 150mm Central Vacuum Orbit 5,0

Mirkacode: **8993000111** EAN: **6416868927665**

MIRKA® ROS 650CV (Central Vacuum) is a Pneumatic Random Orbital with a 5,0 orbit. When connecting the sander to a dust extraction system you are able to sand dust-free. This machine is developed for general sanding purposes on all kind of surfaces.

Mirka ROS 625CV 150mm Central Vacuum Orbit 2,5

Mirkacode: **8993025111** EAN: **6416868935974**

MIRKA® ROS 625CV (Central Vacuum) with a 2,5 mm orbit is an excellent choice for fine sanding tasks. When connecting the sander to a dust extraction system you are able to sand dust-free. MIRKA®ROS 625CV is equipped with a 150 mm backing pad.

Mirka ROS 650DB 150mm Dust Bag Orbit 5,0

Mirkacode: **8993200111** EAN: **6416868928839**

MIRKA® ROS 650DB (Dust Bag) is a Pneumatic Random Orbital with a 5,0 orbit. This sander is equipped with a dustbag, so there is no need for a central vacuum system, only compressed air needed for dust-free sanding.

Mirka ROS 625DB 150mm Dust Bag Orbit 2,5

Mirkacode: **8993225111** EAN: **6416868941173**

MIRKA® ROS 625DB (Dust Bag) with a 2,5 mm orbit is an excellent choice for fine sanding tasks. This sander is equipped with a dustbag, so there is no need for a central vacuum system, only compressed air needed for dust-free sanding.

MIRKA® OS

Mirka pneumatic orbital sanders are ergonomically designed for guaranteed user comfort and constructed of lightweight, hi-tech, precision molded composite materials that provide outstanding strength and durability. The 3.0 mm orbit guarantees a good surface finish. Mirka pneumatic orbital sanders were developed especially for sanding with Mirka's revolutionary Abranet abrasives. When connecting the sander to a dust extraction system you are able to sand dust-free with Abranet.

Mirka OS 343CV 75x100mm Orbit 3,0

Mirkacode: **8991600111** EAN: **6416868928280**

MIRKA® OS 343CV (Central Vacuum) is an ergonomic and lightweight pneumatic orbital sander, ideal for smaller sanding jobs within the window and furniture production. The 3.0 mm orbit guarantees a good surface finish.

Mirka OS 343DB 75x100mm Dust Bag Orbit 3,0

Mirkacode: **8991610111** EAN: **6416868948165**

MIRKA® OS 343DB (Dust Bag) is an ergonomic and lightweight pneumatic orbital sander, ideal for smaller sanding jobs within the window and furniture production. Only compressed air needed for dust-free sanding.

Mirka OS 353CV 81x133mm Orbit 3,0

Mirkacode: **8991800111** EAN: **6416868928754**

MIRKA® OS 353CV (Central Vacuum) is an ergonomic and lightweight pneumatic orbital sander, ideal for sanding jobs within the door and furniture production. Easy to use with Abranet sheets and guarantees a good surface finish.

Mirka OS 383CV 70x198mm Orbit 3,0

Mirkacode: **8991500111** EAN: **6416868904611**

The MIRKA® OS 383CV(Central Vacuum) is recommended for various applications, such as wood and body filler as well as primer and lacquer sanding. This Orbital Sander is recommended to use on small and medium size areas.

AOS

MIRKA® AOS

This orbital spot repair machine has a 32 mm backing pad. The tool can be used for denibbing in Transport, Automotive and Wood applications together with Polarstar SR finessing discs.

The Mirka AOS 130NV tool with a 3 mm orbit is oscillating which results in a finer finish and an easier polishing process.

Mirka AOS 130NV 32mm Orbit 3,0

Mirkacode: **8992330111** EAN: **6416868931297**

This orbital spot repair machine has a 32 mm backing pad. The AOS 130NV tool with a 3 mm orbit is oscillating which results in a finer finish and an easier polishing process.

MIRKA® ROS2

Mirka's pneumatic two-handed sanders combine heavy duty performance and durability with low profile, light weight, ergonomic styling which makes it easy to handle and results in excellent stability during operation.

The optional side handle (included in the kit) provides an extra gripping point to further increase control and reduce effort. This is an excellent machine for fast cutting in more demanding sanding operations.

Mirka ROS2 510CV 125mm Orbit 10,0

Mirkacode: **8994510111** EAN: **6416868936292**

MIRKA® ROS2 510CV (Central Vacuum) is a feature packed 125 mm pneumatic two-handed sander. This is an excellent machine for fast cutting in more demanding sanding operations.

Mirka ROS2 610CV Orbit 10,0

Mirkacode: **8994610111** EAN: **6416868935943**

MIRKA® ROS2 610CV (Central Vacuum) is a feature packed 150 mm pneumatic two-handed sander. It has a 10,0 mm orbit, with a black nickel color on the lever.

Mirka ROS2 650CV Orbit 5,0

Mirkacode: **8994650111** EAN: **6416868938524**

MIRKA® ROS2 650CV (Central Vacuum) is a feature packed 150 mm pneumatic two-handed sander. The machine combines heavy duty performance and durability with low profile, light weight, ergonomic styling which makes it easy to handle.

Mirka ROS2 850CV Orbit 5,0

Mirkacode: **8994850111** EAN: **641686891121**

MIRKA® ROS2 850CV (Central Vacuum) is a feature packed 200 mm pneumatic two-handed sander. This is an excellent sander for industrial applications when sanding bigger surfaces. Equipped with a unique Mirka Net Backing Pad (200mm, 89 holes).

POLISHERS

MIRKA PNEUMATIC POLISHERS

Powerful performance and a compact, streamlined design that allows operators to polish even difficult to reach areas, make Mirka's Polishers the fast way to achieve a perfect, glossy surface finish. The Mirka® ROP2 machine offers a quick and effective method of polishing. Its random orbital action delivers particularly impressive performance when buffing out sanding scratches. The light and ergonomic Mirka RPS 300CV 77mm enables efficient dust-free sanding of small areas. The Two-handed Mirka RP2 300NV 77mm is a powerful tool providing a fast way to a perfect finish. Mirka AP 300NV possesses a low vibration level and the small size makes it easy to handle.

Mirka ROP2 312NV 77mm Non Vacuum Orbit 12,0

Mirkacode: **8994210311** EAN: **6416868937671**

Mirka's pneumatic Two-Handed Polisher features powerful performance, excellent stability during operation and a compact, streamlined design that allows it to polish even difficult to reach areas. The optional side handle provides an extra gripping point.

Mirka RP2 300NV 77mm Non Vacuum

Mirkacode: **8994240311** EAN: **6416868938579**

This Two-handed Rotary Polisher is a powerful tool providing a fast way to a perfect finish. The shape allows operators to reach small areas and the two-handed grip gives great stability in polishing operations.

Mirka ROP2 512NV 125mm Non Vacuum Orbit 12,0

Mirkacode: **8994220311** EAN: **6416868932409**

Mirka's pneumatic Two-Handed Polisher features powerful performance, excellent stability during operation and a compact, streamlined design that allows it to polish even difficult to reach areas. The optional side handle provides an extra gripping point.

Mirka RPS 300CV 77mm Central Vacuum

Mirkacode: **8992340111** EAN: **6416868930375**

Mirka® RPS 300CV can be used for a variety of applications: In bodyshops the small tool is convenient to use for paint removal and panel beating as these areas are often small and hard-to-reach. The tool can be used for both sanding and polishing.

Mirka AP 300NV 77mm Non Vacuum

Mirkacode: **8992340311** EAN: **6416868902587**

The pneumatic polisher provides good visual control over the work and is ideal for spot repair polishing in Automotive applications. The body provides the option of a two-hand grip.

POLISHERS

MIRKA ELECTRIC POLISHERS

The Mirka Polisher features a powerful, high torque electric motor, along with a step-less switch and pre-selection of rotational speed which makes it possible to achieve the precise speed required when polishing. There's also a bail handle and a side handle for better control and a spindle lock to make pad changes easy. To achieve the best results, it's recommended that Mirka polishing compounds, backing pads and polishing pads are used.

PS 1437 is delivered in a cardboard box. PS 1524 is delivered in a plastic box. Both models includes a bail handle and a side handle.

Mirka PS 1437 Polisher 150mm

Mirkacode: **8991300111** EAN: **6416868929553**

Mirka PS 1437 is an excellent tool for polishing smaller surfaces and is designed to be used with a maximum 150 mm pad. To achieve the best results, it's recommended that Mirka polishing compounds, backing pads and polishing pads are used.

Mirka PS 1524 Polisher 180mm

Mirkacode: **8991400111** EAN: **6416868929560**

Mirka PS 1524 is ideal suited for all kinds of polishing tasks from compounding and polishing & fine polishing to buffing on larger surfaces. This polisher has a powerful motor with good cooling properties.

TURN YOUR PS 1437 INTO A SANDER WITH THE DUST SUCTION HOOD

An easy keyless attachment of hood to Mirka PS 1437 polisher suitable for demanding aggressive sanding applications and used together with Abranet ACE HD, it supports the dust-free solution. The front segment can be removed for a better visibility and to reach edges, the springs gives also a smoother operation. The brushes ensure a good suction and protects the surface. The dust suction hood should be used together with the Backing Pad 125mm M14 Grip 17H.

CORDLESS

MIRKA® AROS-B & AOS-B

Mirka is expanding its power tool range by introducing the first small brushless battery driven spot repair sanders. As with all Mirka machines, the ergonomic design has been a priority to ensure that the light tool can comfortably be used for long periods without fatigue. These strong cordless sanders enable a long working time as the battery lasts up to 16 hours in industrial use. The lithium-ion battery charges in only 45 minutes. When using a cordless sander the operator can freely move around the object. As no pneumatic hose is needed the risk of the hose causing defects on the surface being sanded is removed.

Mirka AROS-B 150NV 32mm 10.8V Orbit 5.0
Mirka code: 8991150311 EAN: 6416868900903

Brushless spot repair sander with a random 5 mm orbit. The battery-driven Mirka® AROS-B 150NV is small, ergonomic and energy efficient. The 10.8V Li-ion battery lasts up to 16 hours in industrial use and charges in 45 minutes.

POLARSTAR SR

Polarstar SR is the first in a series of high-technology micro products produced by Mirka. This innovative curing technology is energy-saving with a low carbon footprint. This product is primarily designed for wet sanding, for correction of small painting defects and removal of dust particles in top coats and clear coats. Suitable for both machine and hand sanding.

HOSE 27MM X 10M + CONNECTOR

Flexible suction hose connecting the sander and the dust extractor. Please note that this hose is conical. The benefit of having a conical dust extractor hose is that it improves the dust suction. The extended length, 10 m, gives more possibilities for movability.

Hose 27mm x 10m + Connector

Adapter	Description
8999804111*	1 Hose Ø 27 mm x 0,5 m + Connector. This conductive adapter enables a quick change in-between Mirka power tools. Fix the adapter on each tool and connect/disconnect to/from any Mirka hose assembly with a Mirka branded adapter, both pneumatic: 8992514511, 8992515011 (also the old version of 8992514511) and electric: MIE6514511 and MIE6514711.
8992515811*	2 Mirka Connector for Air + Electric Hoses. Comes with hoses MIE6514511, 8992514511, 8992515011. a
8992515911*	2 Connector for Air + Electric Hoses with threads. This adapter is close to the dust extractor, where the pneumatic tube/electrical cable comes out. Comes with hoses MIE6514511, MIE6514711, 8992514511, 8992514711 and 8992515011. b
8992515611*	3 Hose adapter Ø 32 mm / 54 mm for Mirka® Dust Extractors. Comes with hoses MIE6514511 / MIE6514511US, MIE6514711 / MIE6514711US, MIN6519411, MIN6519711, 8992514511, 8992514711 and 8992515011. This adapter goes from the hose into the dust extractor.
8394020311**	4 Hose Connector Kit No. 3-1 and 3-2 for Mikro 95S* & 95S*-S. Adapter for both ends on the hose for Mikro. Connector 4b: Ø 54 mm.
8391111111*	5 Adapter Ø 20 mm / 28 mm for Mirka® Hand Sanding Blocks. Enables using the Ø 27 mm hose (MIN6519411) together with the blocks.
8992515411*	6 Soft Connector Ø 25,4 mm. Delivered together with hose MIN6519411. Enables connecting MIN6519411 hose to Mirka Decosander®, Mirka Dust Suction Hood and sanders of other brands. Note! Not suitable for Mirka® CEROS or Mirka® ROS.
8993022011	7 Hose Swivel Connector Ø 20 mm / 20 mm. Enables connecting two Ø 20 mm hoses. For example: 2 x Ø 20 mm hose x 4 m hose (8391112011).
8992515711*	8 Hose Connector Ø 32 / 32 mm. Delivered together with extension hose MIN6519711. Enables connection with the hose MIN6519411.
8393001511*	9 Adapter Ø 30–48 mm for Dust Extractor. Can be cut to fit dust extractors of other brands.
8993022911	10 Hose Swivel Adapter 20 / 25,4 mm. Enables connecting a Ø 20 mm hose with Ø 27 mm hose MIN6519411.
8999814111**	11 Hose 20 mm x 0,5 m + Connector. This antistatic adapter enables a quick change between Mirka power tools with 19 / 20 mm dust extraction fittings, e.g. Mirka® OS CV and Mirka® ROS 77 mm CV. Fix this adapter on each tool and connect/disconnect to/from any Mirka hose assembly.
8391111211	12 Connector Air Inlet for Hand Sanding Block 20 / 20 mm. When fixed on a Mirka 20 mm dust extraction hose, this new connector enables a quick and smooth change of the hose from one Mirka hand sanding block to another. This connector enables adjusting the airflow.

Mirka Hoses & Adapters

 All adapters shown on this overview are included in the box with the particular hose. Only exception is parts with separate Mirka code. The adapters 1-12 can also be ordered as spareparts.

DON'T LET THE DUST HAUNT YOU

FOR THE STORE

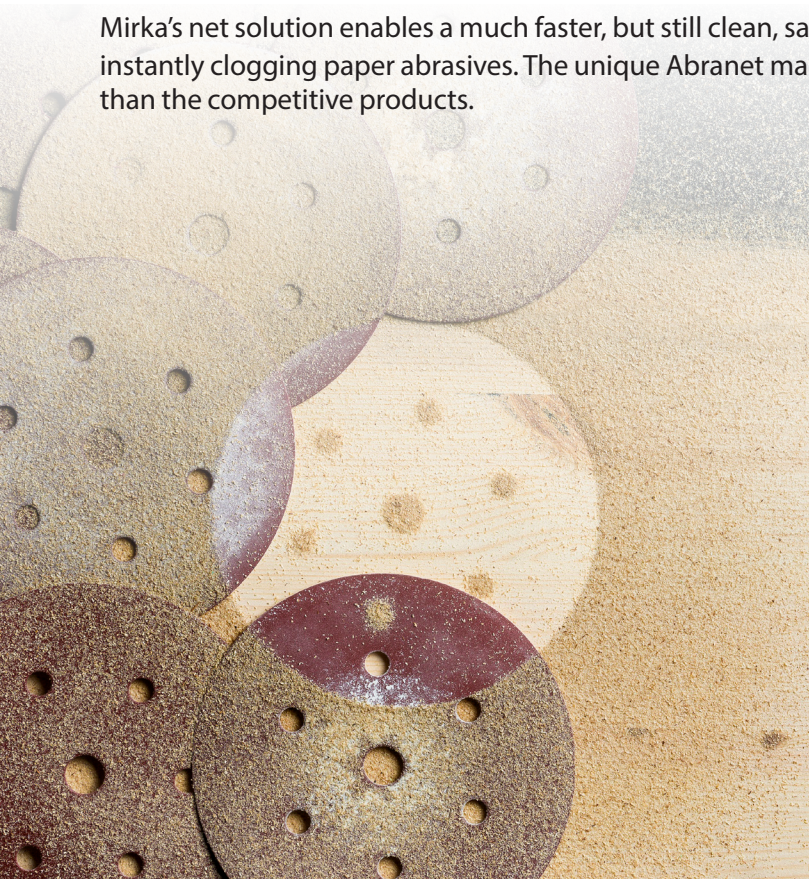

IMPROVE YOUR STORE WITH THE MIRKA RANGE

Mirka is enjoying a growing popularity in the construction and building industries where dust can be a major workplace concern. Mirka offers easy-to-use, high quality dust-free net sanding concepts as well as traditional abrasives to professional and semi-professional workers. Jobs, such as sanding interior walls and ceilings become so much easier and cleaner with Mirka's wide and unique range of products and solutions for coarse, intermediate as well as for fine sanding applications.

Mirka's small packs for construction and decoration are designed to facilitate the customer's buying process. The packages have all application pictures on the front side to help the buyer in choosing the right product. All packages are also equipped with a window through which it is possible to touch the product surface.

The labels have a QR code through which the buyer can get additional information about how to use the product, the product range, technical specifications, pictures and related products. This will help the buyer in the decision making.

Mirka's net solution enables a much faster, but still clean, sanding. A common problem is that the fine dust is instantly clogging paper abrasives. The unique Abranet makes a proper cutting without clogging and lasts longer than the competitive products.

Multifunctional, dust-free net abrasive, especially developed for sanding putty, primers, lacquers, composite materials and a large amount of other materials. Long-lasting, cost-effective and easy to use.

ABRANET

The multifunctional and classic Abranet is especially developed for sanding putty, primers, lacquers, composite materials and a wide range of other materials for industrial use. Abranet combines high performance and a longer lifespan than traditional abrasives, making it a cost-effective solution. Designed for dry sanding by machine or by hand, its true dust-free sanding characteristics result in a cleaner work environment, as well as a better surface finish.

Multifunctional, dust-free net abrasive, especially developed for sanding putty, primers, lacquers, composite materials and a large amount of other materials. Long-lasting, cost-effective and easy to use.

DUST-FREE PERFECTION

With Abranet, Mirka has succeeded in something where many others have previously failed – to develop a completely even sanding net. Its thousands of holes provide phenomenal dust extraction. Using Abranet, dust is removed from the space between the abrasive and the sanded surface, which means that the abrasive grains are cutting the surface more efficiently.

Roundy Dust-Free Hand Block, 2 x adapter

Hose 20mm x 4m for Hand Sanding Blocks

WHEELS

Colour coded wheel labels

Wheels have been colour coded according to the materials for which the wheels are suitable.

-  Carbon steel and casts
-  Stainless / acid resistant steel
-  Aluminium and soft metals
-  Stone, concrete, plastics and synthetics
-  Almost any material

-  = Wear eye protection
-  = Use dust mask
-  = Use ear protection
-  = Do not grind in a too tight angle
-  = Only for cutting – not grinding (BF 41 and BF 42 > 4 mm)
-  = Wear protective gloves
-  = Read safety instructions

HIOLIT XO

Hiolit XO is a semi-open stiff universal abrasive for belt sanding and other machine sanding where it has excellent edge wear resistance and durability. In particular, it produces high quality results on challenging materials – for example, grits 36–80 are suitable for aggressive sanding, such as severe rust damage, as well as other sanding operations where large amounts of material need to be removed.

DELIVERY TERMS

EXW (Ex Works...)

The buyer is at risk when the goods have been placed at his disposal at agreed time and place.

→ Insurance to be covered by the buyer. The buyer bears the risk during the whole transport.

FCA (Free Carrier...)

The buyer is at risk when the goods have been delivered to the first carrier or terminal at agreed time and place.

→ Insurance to be covered by the buyer (the seller up to the named point).

FAS (Free alongside ship...)

The buyer is at risk when the goods have been delivered alongside the ship at the port of shipment.

→ Insurance to be covered by the buyer (the seller up to the ship).

FOB (Free on board...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

→ Insurance to be covered by the buyer (the seller up to the ship).

CFR (Cost and freight...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

→ Insurance to be covered by the buyer (the seller up to the ship).

CIF (Cost, insurance and freight...)

The buyer is at risk when the goods have been delivered onboard the ship at the port of shipment.

→ Insurance must be covered by the seller (in favour of the buyer) to the port of destination complying with at least Institute Cargo Clauses (C) or similar clauses (further transports by the buyer).

CPT (Carriage paid to...)

The buyer is at risk when the goods have been delivered to the first carrier or terminal.

→ Insurance to be covered by the buyer.

CIP (Carriage and insurance paid to...)

The buyer is at risk when the goods have been delivered to the first carrier.

→ Insurance must be covered by the seller (in favour of the buyer) to the place of destination complying with at least Institute Cargo Clauses (C) or similar clauses (further transports by the buyer).

DAP (Delivered at place...)

The buyer is at risk when the goods have been placed at his disposal at agreed place of destination ready for unloading.

→ Insurance to be covered by the seller to the place of destination (further transports by the buyer).

DAT¹⁾ (Delivered at terminal...)

The buyer is at risk when the goods have been placed at his disposal at agreed terminal unloaded.

→ Insurance to be covered by the seller to the terminal (further transports by the buyer).

DDP (Delivered duty paid...)

The buyer is at risk when the goods have been placed at his disposal at agreed place of destination cleared for import and with duties paid ready for unloading.

→ Insurance to be covered by the seller. The seller bears the risk during the whole transport.

1) "Named terminal" includes such as quay, warehouse, container yard, road-, rail or air cargo terminal at named port or place of destination.
