# Mercalin Marking Spray

---

Mercalin is the leading marking spray brand in Scandinavia. Our experience enables us to produce aerosols that meet the special requirements of our customers. Technima Nordic AB takes care of promoting and distributing the Mercalin brand in the Nordic market.

## Ergonomic design

Mercalin marking spray cans are fitted with safety caps that allow professionals to open them using only one hand. They also prevent accidental release.

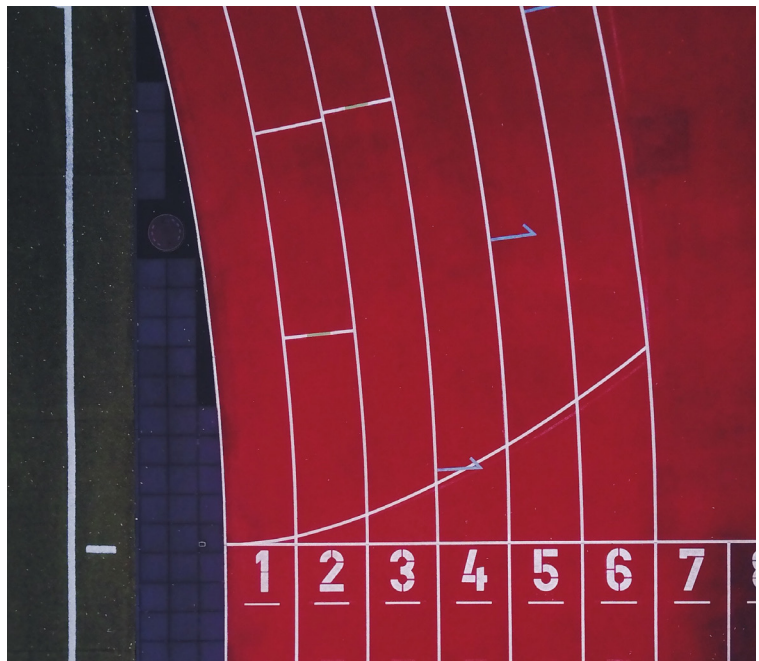

## Range of Colours

Marking spray paints offered by Mercalin come in a range of colours to meet your requirements, including fluorescent markers to really make the paint stand out from the surface.

## Durability and visibility

Mercalin paint is made using the best pigments to ensure high-quality surface marking for all professionals. You will enjoy the same results for short term use (Mercalin TS) as you will for long term use (Mercalin RS).

Our products are for professional use only.

# Mercalin RS

## Construction site marking spray

---

Mercalin RS is a versatile marking spray for use in the construction of roads, buildings, tunnels, mines and in geodesy. This worksite marker is primarily used outdoors. Its safety cap and 360° nozzle make Mercalin RS marking spray easy to use. Mercalin RS can be used on a variety of surfaces (even damp ones) such as asphalt, concrete, grass, gravel, wood, rock and ice.

## Data sheet

Field of use: Public works & construction

Application: Marking roads

Product type/clear coat: Non-fluorescent marking paint/product complement

Marking duration: 12 months

Volume: 500 ml

# Technima Group

## The story about Technima Nordic

In 2009, the Technima group acquired Mercalin, the leading Scandinavian brand in the aerosol marking paint market. A new company, Mercalin AB, was created to distribute spray marking paints throughout Scandinavia. Its central warehouse is located in Gothenburg, Sweden.

Mercalin AB not only reinvented all of these aerosol marking paints, but in 2010 it also introduced the first safety spray paint cap ever manufactured.

In 2012, the Technima group decided to buy the business operations of Soppec's exclusive importer in Sweden and entrust its management to Mercalin AB.

As part of this development logic, and also with the goal of getting closer to its customers, the Technima group decided to unify its sales force and distribution.

All of the group's trademarks, products and Scandinavian customers are now managed by a local team dedicated solely to the specific needs of the aerosol marking market.

A logistics platform with a capacity of several hundred pallets was created, allowing a maximum delivery time of 72 hours in all countries.

In 2015, Mercalin AB became Technima Nordic AB. Its development continues.
