

Machinery for flexible pallet production

## Production of special pallets – IMH has the solution

IMH Service offers a unique standardized system for production of special pallets. The solution is flexible machinery based on our hydraulic nailing technique and specially adapted computer programming which allows short adjustment times.

Customer requirements and flexibility are key-words in our company. In cooperation with our customers, we bring out solutions that live up to stated requirements. The quality of our products gives a high performance level.

IMH represent creativity, knowledge and experience that our skilled co-workers possess. We are a complete supplier of pallet machinery. In addition to development and production of pallet machinery, we also offer our customers support and technical advice.

## IMH Machinery – maybe the most flexible nailing equipment on the market?

The unique flexibility of IMH machines is based on:

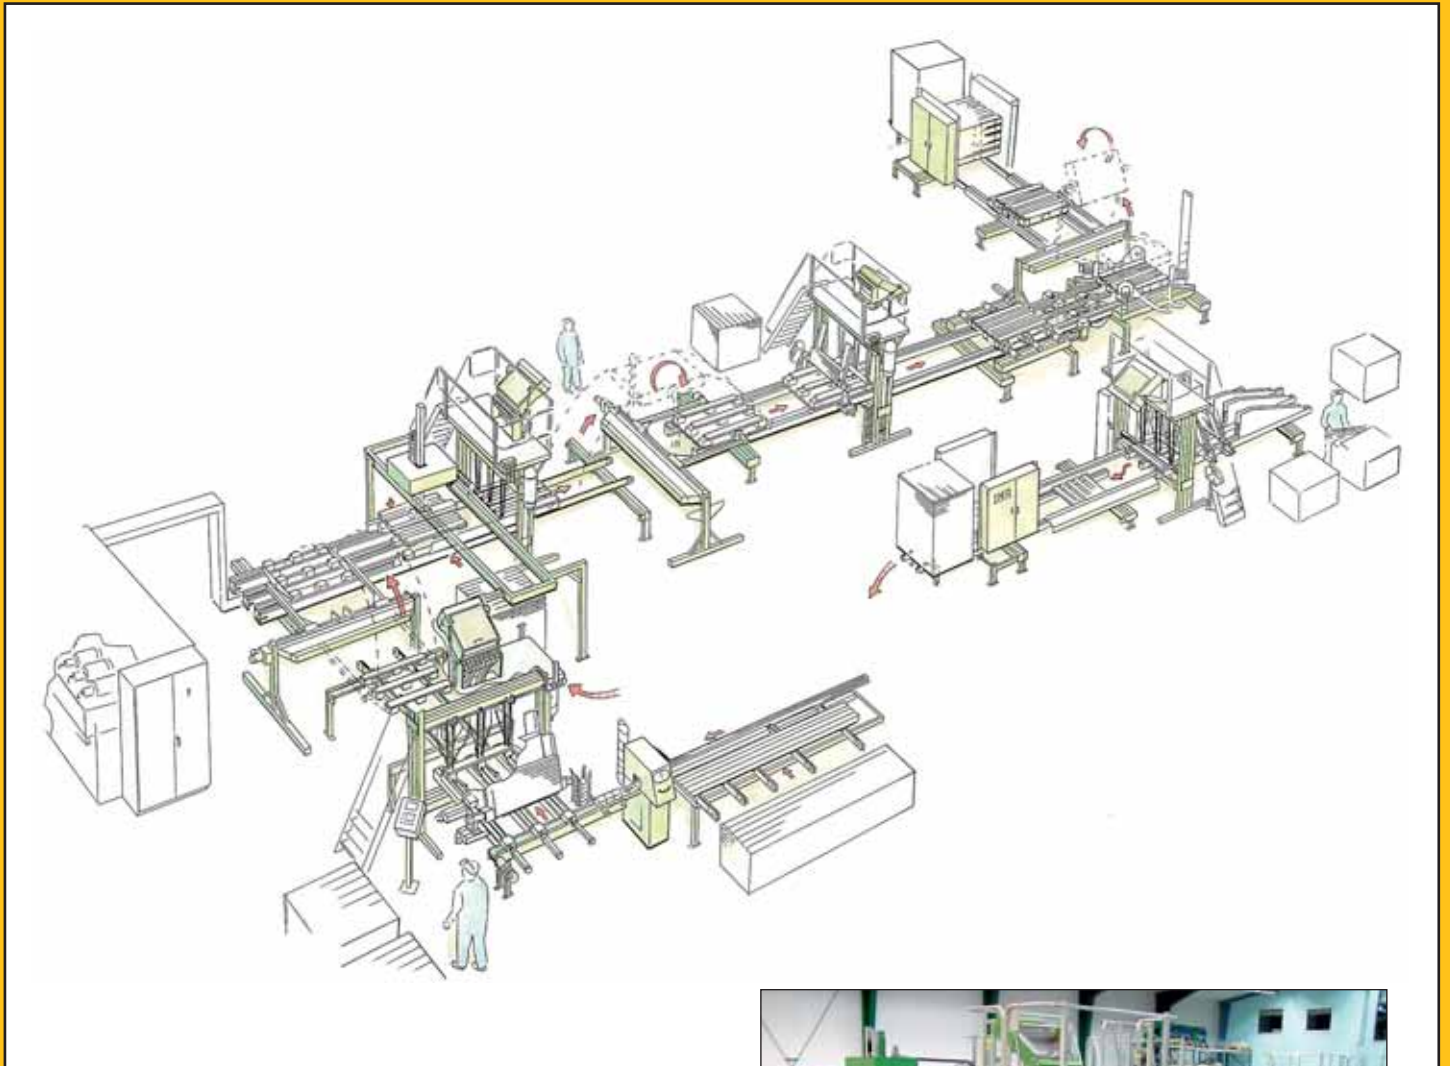

- Easy and rapid changeover between different types of pallets
- Operator friendly, flexible steering systems
- Layout solutions adapted to customers need (U-shape, straight line, square or Z-shape line)
- Individual hydraulic nailing tools for bulk nails
- The possibility to easily upgrade for new products and technical solutions
- Different types of fastening techniques (nail, wooden plug, screw and glue)
- Considered ergonomic working environment

Contact IMH for more information about our complete production line, IMH Kombiline, or our separate machines.

Sales department in Kopparberg

## IMH Kombiline

IMH Kombiline consists of five different machine modules. These five modules are manufactured separately and they have their own hydraulic and steering system, which makes it possible to buy and use the modules separate or as a complete line, as shown in the picture above.

## Fast service

IMH takes care of service and support during the guarantee time. Our qualified service engineers assemble and test the machines before delivery, as well as at our customers' location. IMH perform service on location and we also offer a sophisticated phone support. It is a safety for our customers that we can perform fault-detection and programming via modem and give service on-line. The operators are provided with a basic education before the machine is taken into operation

We are located in Kopparberg, Sweden and we have agents representing us in Europe. In that way we are always close to our customers.

You can order spare parts through e-mail [spareparts@imhservice.se](mailto:spareparts@imhservice.se)  
fax +46(0)580-886 79 or phone +46(0)580-886 62
