

Protecting people, facilities
and equipment **for over 30 years.**

McCue 2019 Product Guide

A look at what's new!

CrashCore Bollard

What could be better? As far as we're concerned, nothing, because **CrashCore** prevents accidents and saves lives. And if you thought you were strong, you've got nothing on **CrashCore**. Certified to stop vehicles traveling up to 30mph — it's the real deal.

Flexcore Bollard 8

Safer and stronger, our patented FlexCore Bollard spins, absorbs, deflects and turns heads. Stronger than steel plate safety bollards and easier on your equipment and people.

Rack Mounted Guard

Our Rack Mounted Guard is an easy-to-install, high-strength solution to protect your racking & its contents. The polyethylene body provides strength and durability to absorb impacts and is flexible to suit a variety of racking sizes. Just wrap the velcro straps around the racking leg and you're done.

Architectural Bollard

Our more aesthetically pleasing new edition to the Eco Bollard range. Eco Car Park Bollard range is used to create a safe environment for customers moving around the car park. The bollards offer an environmentally friendly and low maintenance alternative to traditional stainless steel or painted products.

McCue Bumper

WE'LL KEEP YOU LOOKING SMASHING.

Some might even mistake our bumpers for decorative accents, with their stunning colours and sleek curves. But behind all that style is the toughest thing out there: polycarbonate—the same material used to make bulletproof glass, football helmets and riot shields. It's eco-friendly, available in seamless form and installs in minutes—to keep your merchandise protected and your store looking new.

Our strength in Bumper comes from a commitment to innovative products and materials.

Green

Be good to the Earth, for not a penny more.

Our 100% polycarbonate GreenGuard bumper is tough, attractive and environmentally friendly. Made from pre-consumer recycled material and 100% recyclable, Green Guard bumper protects the environment just as much as your store. Use it, remove it and recycle it.

The recycling symbol and resin identification code etched on each McCue Bumper is important. It lets you know what it's made of so it can be commonly recycled. Just place it right into a curbside recycling bin for pick-up.

Streamline style without the fuss of end caps.

Through our unique ability to thermoform bumper ends, we were able to eliminate gaps between bumper and end caps resulting in a seamless appearance and fewer spaces to collect dirt. A new, integrated hidden end cap keeps bumper pieces from shifting when hit, resulting in strong and attractive fixture protection in your store.

Takes hard hits and won't hold a grudge.

Our bumper's shock displacement design works through expansion—quickly absorbing energy and rebounding to its original shape. Make sure your fixtures stay protected with bumper that's engineered to take it.

GreenGuard™ 1

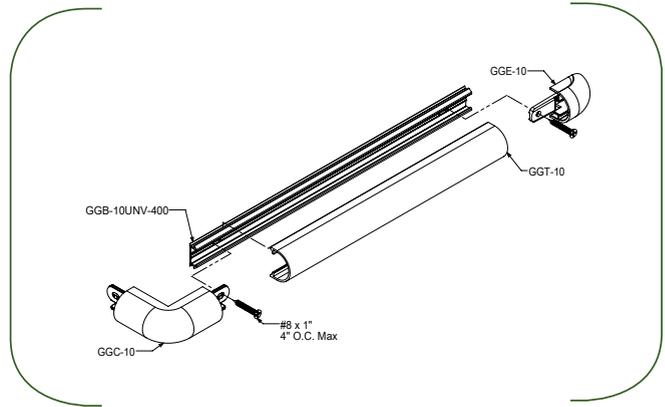

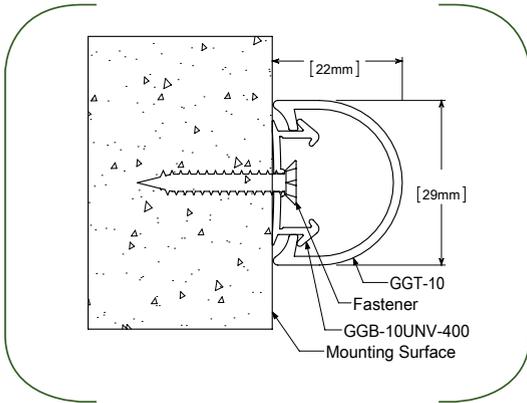

1-Inch Rigid Polycarbonate Bumper

GreenGuard is McCue's protective bumper that provides improved impact performance, delivers simply beautiful aesthetics and is 100% recyclable. GreenGuard 1 is our most versatile offering, suitable for a variety of applications.

- Exceeds the impact performance of PVC by 29% and ABS by 63%
- Polycarbonate is chlorine free, 100% recyclable and better for the environment than PVC
- All parts snap together for easy installation and guaranteed alignment for a polished look

McCue Preform[®] Bumper

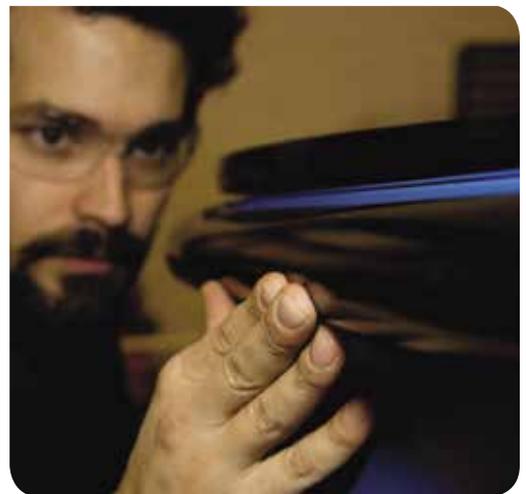

Custom Formed Ends and Corners

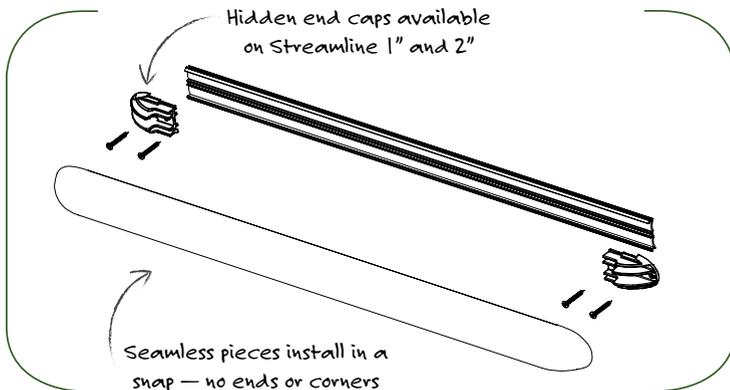

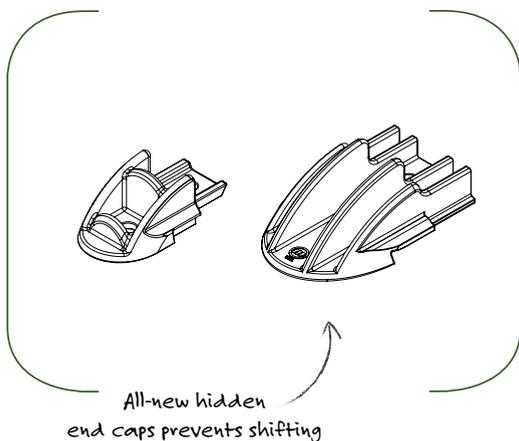

We pioneered the process of thermoforming bumper around radius corners, eliminating unsightly gaps that trap food and debris. Give your fixtures a seamless sleek look with custom formed corners and ends. Installation occurs with a snap, saving you time and cost on installation.

- Less hardware, less parts, less installation time
- Never worry about end caps and corners again by having them preformed
- All parts snap together for easy installation
- Doesn't shrink

Rigid GreenGuard Streamline 

Available in a variety of GreenGuard bumper profiles
 Custom cut lengths to order
 Streamline 1" and 2" include two new hidden end caps

Stainless Steel Bumper

Seamless, Customizable Stainless Steel Bumper

Using a shock-diffusing foundation, we designed a modern, seamless, stainless steel bumper system. It installs in minutes, sits flush to the wall, requires no maintenance—and resists everything from fingerprints, to rust, to direct hits by shopping carts.

- Smooth, seamless, brushed stainless steel gives a contemporary aesthetic to your space—perfect for retail environments, grocery stores, airports and hospitals
- Custom cut or cut to fit on-site, it installs into virtually any space using only a drill and a screwdriver, with all hardware cleverly covered by the stainless steel faceplate
- Brute impact forces are distributed along the face of the steel bumper and transferred to the polycarbonate foundation

GreenGuard Edge

2-Inch Wide, Rigid Rectangular Bumper

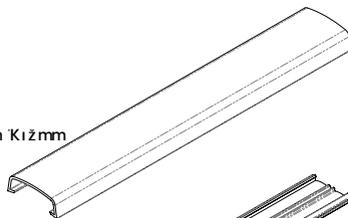

Engineered to the same standards as our popular curved bumper, our new rectangular bumper offers a sophisticated, streamlined look—a sleek, modern choice. Made from polycarbonate, it diffuses shock from impacts, is entirely maintenance free and attaches to the same 2” universal mounting base as the curved bumper, making it easy to swap styles.

- A new choice in bumper protection—with smooth, modern lines and available in a wide range of colors to suit any retail environment
- Tested to the same standards as our curved polycarbonate bumper—exceeding the impact performance of PVC by 29% and ABS by 63%
- Entirely modular, with each piece snapping together on our 2” universal mounting base for easy installation and guaranteed alignment

ALL THE RIGHT ANGLES.

Here's the thing about trolleys and corners—they have a tendency to collide. That's why we engineered our corner protection to deflect glancing blows and absorb direct hits. With an extensive range of smartly designed options—and exclusive features like the built in wrench option for easy removal and replacement when cleaning—they add style to your store and provide an unparalleled level of protection and peace of mind.

CartStop CG

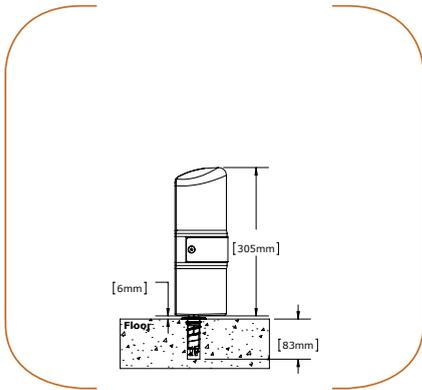

Slim-Line Corner Protection

Our CartStop CG protects valuable corners from damage. They mount right up against the case, eliminating tripping hazards. Additionally, they're removable for thorough cleaning.

- Integrated handle for easy carrying and positioning
- Installs quickly and securely with our patented shock absorbing flange anchor system—eliminating messy adhesives
- Stainless steel legs and strike plate

Flex Post 3

Impact-Absorbing Posts In Stainless Steel

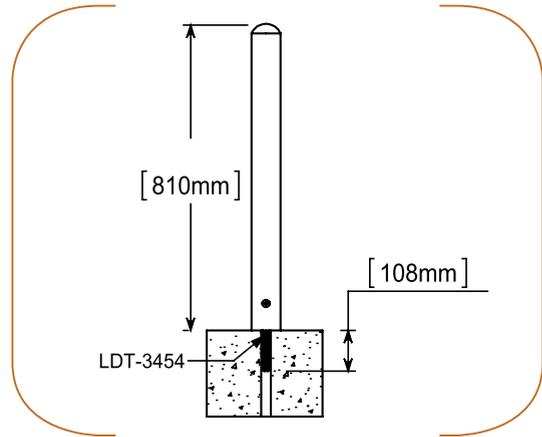

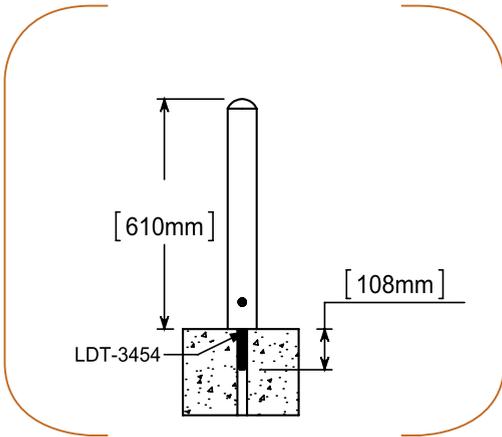

Flex Post 3 is ideal for retailers who want the simple, clean look of stainless without sacrificing strength. It's packed with impact-absorbing flex technology that takes big hits from a pallet jack or floor scrubber and still stands up straight. Use in place of plate mounted bollards for improved performance and aesthetics.

- Impact-absorbing hidden core provides unprecedented strength
- Full corner protection in two sizes
- Mounted with one high-strength concrete anchor for quick and easy installation
- Also available in zinc electroplated steel finish for back room application, please see page 67

Patent 8444343

THE TROLLEY STOPS HERE.

There's no driving school for shopping trolley pushers, no license needed to operate a floor buffer, and no mandatory training to steer a pallet jack—which is where our floor mounted rail systems come in. Engineered to deflect runaway trolleys, absorb hits from speedily spinning scrubbers and diffuse and deflect direct impacts from heavy equipment, they provide all the protection your store needs to keep moving at the pace you demand.

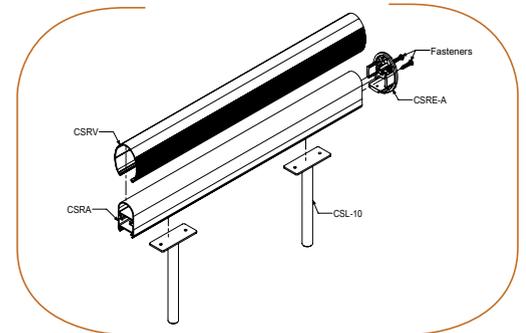

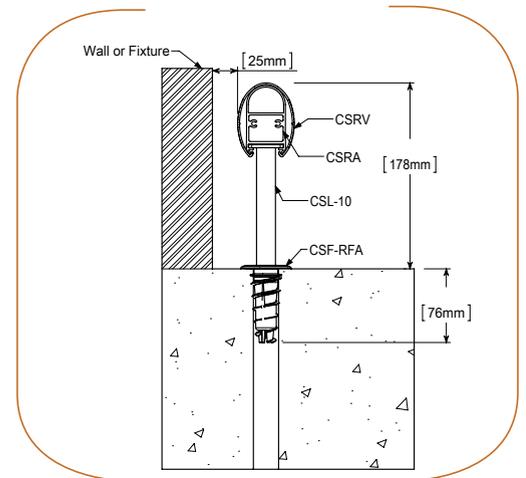

CartStop® RE

Reversible Elliptical Floor-Mounted Rail System

CartStop RE is attractive and provides reliable protection. A high-impact, 90° rubber corner redirects impact energy by deflecting damaging blows away from your expensive store fixtures.

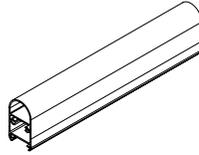

- Tough rubber corners provide 90° of protection and eliminate the need for additional corner protection
- Roller corners adjust to fit a variety of wedge-shaped cases and fixtures
- Removable for easy cleaning
- Reversible covers for twice the lifespan

RIGHT THIS WAY, PEOPLE.

Sometimes customers just need a little guidance. That's where McCue Rail systems come in. Engineered with our unrivaled attention to detail, our chrome rails are built to withstand decades of use with virtually no maintenance. With a premium appearance and the versatility of indoor or outdoor use, they improve traffic flow, protect your merchandise and equipment, and facilitate an orderly retail environment—so your store can perform its best.

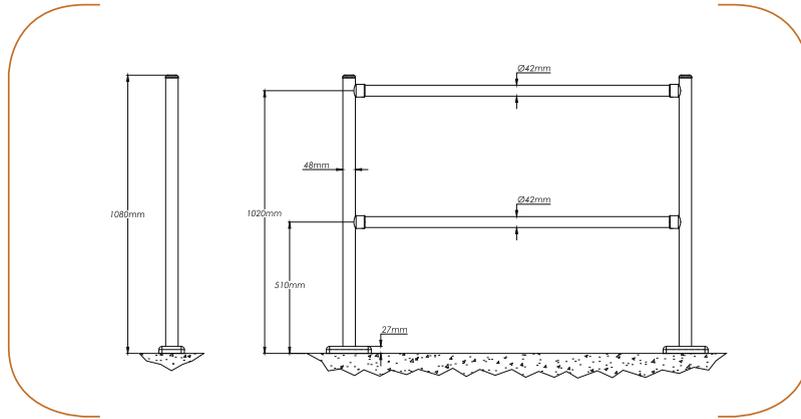

Guidance Rail

Modular Chrome Guidance Rail System

Guidance Rail provides a superb modular barrier system to suit all retail store configurations. Its a perfect fit for customer queuing systems and in-store trolley storage areas.

- 4 expansion anchors per post
- No welding makes it easy to install anywhere
- High quality chrome coated finish
- 48.26mm outer diameter tube and 1.1m height

I Beam Protection Kit

I Beam Protection Kit is specifically designed to protect columns in the sales floor and mezzanine environments. Manufactured from grade 304 stainless steel, the kit provides robust protection that is suitable for internal and external use. The modular kit has been designed to be cut and altered to fit any column size variations.

- Robust, durable stainless steel with a visually esthetic satin polished finish
- Nylon joining spigots for a seamless connection between tubes
- Modular to accommodate any column size variations
- Simple installation process

Back of House and Outdoors

WHAT HAPPENS IN THE BACK ROOM, MAKES ITS WAY TO THE FRONT ROOM.

Everybody knows the rules in the back of house are different. Things move faster, the equipment's bigger, and the pace keeps up all day and night. We engineered our back of house systems for the relentless way of life back there—built to install fast, protect every inch of space and require no maintenance. When your equipment is safe, your facility is protected and your employees are protected, it makes a difference to your entire store.

FlexCore[®] Bollard

Surface-Mounted, Shock-Absorbing Bollard

Say goodbye to the time-consuming, cumbersome process involved with installing core-drilled bollards. With no more holes to dig, concrete to pour or pipes to paint, the FlexCore Bollard installs in a fraction of the time and at much lower cost, without sacrificing strength.

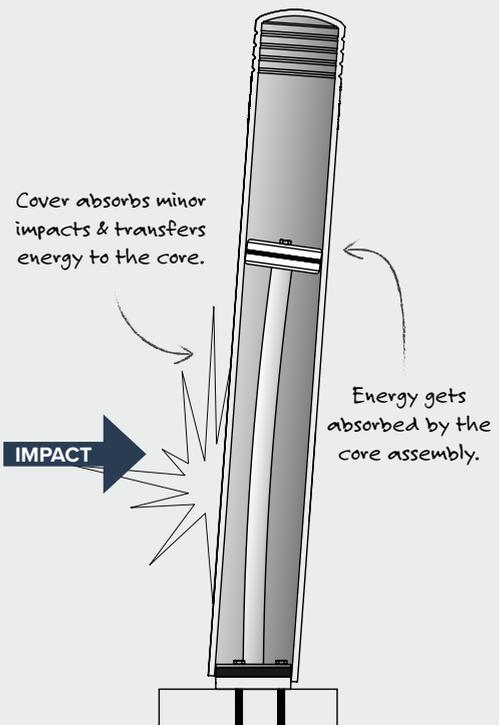

- New for 2014—a thicker core and new shock-absorbing washer combine to disperse energy from stronger hits
- Installs in less than 10 minutes using only 3 bolts—easily removed or relocated
- Patented, energy-absorbing design withstands impacts without damaging the concrete
- Never needs repainting and is available in yellow, black or custom colours to match your decor

See it in action at

► How it works

Systems Protector

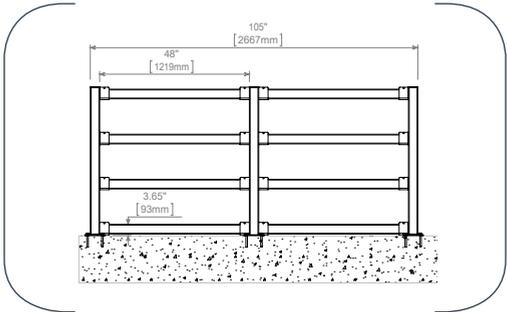

Protects Essential Systems While Maintaining Accessibility

Are you tired of runaway pallets, pallet jacks and forklifts banging up the electrical, plumbing, refrigeration and information systems that are critical to keeping your business running? Systems Protector provides reliable protection from damaging blows, saving you money on costly repairs, while allowing full access to your systems when needed.

- Strong: Heavy-duty steel construction with safety yellow powder coat finish is impact resistant to warehouse equipment
- Innovative: Steel cross members safely protect critical systems, yet easily removed to allow access for maintenance and service
- Speedy install: Self-threading concrete anchors eliminate the need for messy adhesives or cement — just drill and bolt to the floor

48" UPRIGHTS

Hardware included—all uprights ship with 4 concrete anchors

Chiller Rail

Protective Floor Rail

Chiller Rail is a versatile solution to preventing damage to internal cold rooms. The product can be attached to the floor or wall (at any height). Manufactured from recycled High Density Polyethylene, the environmentally friendly rail provides excellent impact resistance and can remain fully functional in temperatures as low as -20°C.

- Manufactured from recycled HDPE, offering high strength and durability.
- Wall or floor mounted.
- Modular design and pre-cut holes enable quick and easy installation.
- Abrasion resistant.

Galvanised Corner Guard

Heavy Duty Corner Guards

McCue's Galvanised Corner Guard is produced using 6mm galvanised steel for high strength and a long product life cycle. Standing at 610mm high, the folded steel profile is designed to protect exposed corners, door edges, frames and pallet racking.

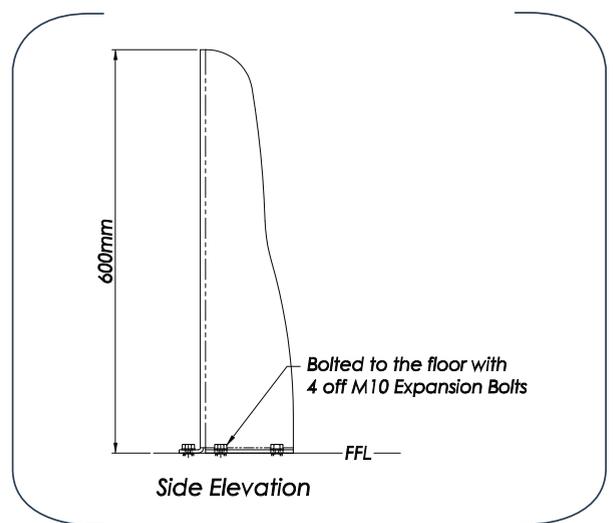

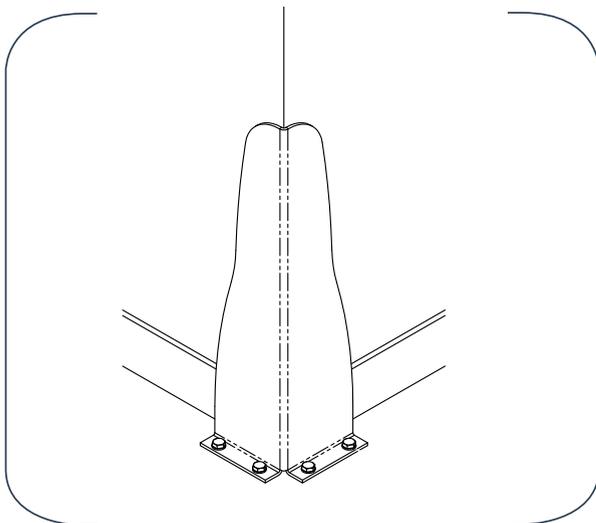

- Created from galvanised sheet steel for high strength and durability
- Ideal for a number of situations, protecting any 90° corner
- Quick, simple installation
- Slim-line, unobtrusive profile
